

# Safety symbols

= Explosive

= Flammable

= Gas under pressure

= Corrosive

= Harm to health

= Dangerous to the environment

## A Guide to Safe Building and Painting

# Building

- Build in a well ventilated area.
- A sharp blade is safer than a dull blade.
- Keep the blades of hobby knives covered when they're not being used.
- Always cut away from yourself when using hobby knives.
- Keep plastic glue away from heat as it is flammable.
- Don't directly touch super glue before it is dry.
- Work over a work station like a desk.

# Painting

- Spray in a well ventilated area (ideally outside).
- Wear a mask when spraying.
- Keep any drinks away from your paint water.
- Be careful not to ingest methylated sprits or acetone.
- Keep methylated sprits away from heat.
- Don't lick your brushes after using thinner or brush cleaner
